

Financing the ICPD Programme of Action: Data for 2011 Estimates for 2012/2013 Projections for 2014

“The [ICPD] Programme [of Action] is critical to achieving the Millennium Development Goals. It is especially important for goal number five: to cut maternal mortality and achieve universal access to reproductive health care. To fully carry out the Cairo Programme of Action means providing women with reproductive health services, including family planning.”

Secretary-General Ban Ki-moon, General Assembly Commemoration of the 15th Anniversary of the International Conference on Population and Development, October 2009

Why Fund Population Activities?

Population dynamics and reproductive health are central to development and must be an integral part of development planning and poverty reduction strategies. The Millennium Development Goals, especially the eradication of extreme poverty and hunger, will not be achieved if issues of population and reproductive health are not adequately addressed. Implementing the ICPD Programme of Action, especially the reproductive health goal, is essential for meeting the Millennium Development Goals directly related to health, including child mortality, maternal health and HIV/AIDS prevention, and social and economic outcomes, including gender equality and poverty eradication.

What Will It Take to Achieve the ICPD Objectives Today: Revised Cost Estimates

To ensure adequate funding for the implementation of the ICPD Programme of Action, the United Nations Population Fund (UNFPA) reviewed the existing estimates for the four categories of the ICPD costed population package (ICPD para. 13.14) and revised them to meet current needs. These revised estimates are much higher than the original ICPD targets agreed upon in 1994 because they take into account both current needs and current costs and because they include interventions such as AIDS treatment and care, and reproductive cancer screening and treatment, that were not part of the original costed population package. The revised costs are considered minimum estimates required to finance the costed population package which includes interventions in the areas of family planning, reproductive health, STI/HIV/AIDS, and basic research, data and population and development policy analysis.

Where Is The Money Going?

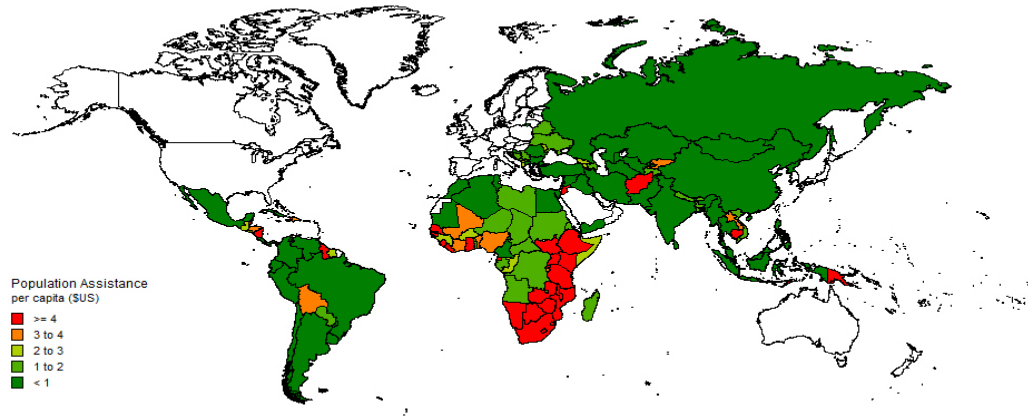

Since 2000, the largest proportion of total population assistance goes to fund HIV/AIDS activities.

Expenditures by ICPD Category as a Percentage of Total Population Assistance, 1995-2011

Population Assistance Per Capita, 2011

Which Countries Benefit Most From Population Assistance?

In 2011, 157 countries benefited from population assistance. Of the funds going to the five geographic regions, sub-Saharan Africa received the largest share (67 per cent) followed by Asia and the Pacific (22 per cent), Latin America and the Caribbean (6 per cent), Western Asia and North Africa (3 per cent) and Eastern and Southern Europe (2 per cent).

How Much Are Countries Mobilizing for Population Activities?

The Resource Flows Project estimates that developing countries and countries in transition mobilized \$54.7 billion for population activities in 2011. Domestic resources include government, national NGO and private out-of-pocket expenditures.

The global figure of domestic expenditures reflects the commitment of developing countries, regardless of the amount mobilized, although it contains significant variations among countries in their ability to mobilize resources for population activities. Many countries, especially those in sub-Saharan Africa and the least developed countries, are not able to generate the necessary resources to finance their own population programmes. Most developing countries rely to a large extent on donor assistance.

It must be pointed out that consumer spending as measured by out-of-pocket expenditures represents the largest part of domestic resources spent on population activities. Indeed, although not easy to track, the role played by consumers in spending for family planning, reproductive health and STD/HIV/AIDS is much larger than usually assumed. In many cases, this exceeds government and NGO expenditures. Although variations exist between regions and countries, if spending on family planning, reproductive health and STD/HIV/AIDS is completely in line with spending on health in general, then it can be assumed that consumers in developing countries pay more than half of the burden of such expenditures. Out-of-pocket spending by consumers, especially the poor, has important implications for policy initiatives aimed at reducing poverty and income inequality in the developing world.

Estimate of Global Domestic Expenditures for Population Activities, 2011 (Thousands of US\$)

Source of Funds

Region	Government	NGO	Consumers *	Total	% AIDS
Africa (sub-Saharan)	3,244,374	119,916	3,567,490	6,931,780	95%
Asia and the Pacific	11,249,700	157,910	27,944,254	39,351,864	10%
Latin America and the Caribbean	2,190,262	80,799	1,133,654	3,404,715	85%
Western Asia and North Africa	542,511	60,014	349,920	952,445	36%
Eastern and Southern Europe	2,669,365	16,025	1,374,723	4,060,113	96%
Total	19,896,212	434,664	34,370,040	54,700,916	32%

* Consumer spending on population activities covers only out-of-pocket expenditures and is based on the average amount per region measured by the WHO for health care spending in general. For each region, the ratio of private out-of-pocket versus per capita government expenditures was used to derive consumer expenditures in the case of population activities.

The Way Forward

Current funding levels are below what is necessary to meet current needs. Given the global financial crisis and the uncertainty of future funding levels, full implementation of the Cairo agenda may be in jeopardy.

The success of the ICPD depends greatly upon the willingness of Governments, local communities, the non-governmental sector, the international community and all concerned organizations and individuals to turn the ICPD recommendations into action.

The challenge before the international community is to mobilize the additional resources required in all areas of the ICPD costed population package: family planning services, reproductive health services, STI/HIV/AIDS activities and basic research, data and population and development policy analysis. Both international and domestic allocation of resources to population activities must increase from present levels to meet current needs.
